CLAIMS

- Sub
AT
1. A method of finding WWW pages, each of which includes at least one list of links to desired Internet resources, comprising:
- 5 providing a list of URLs;
- automatically generating at least one query for an Internet search tool for WWW pages that include links to at least one URL of said list of URLs;
- executing said at least one generated query to provide search results that include at least one of said searched for WWW pages; and
- 10 generating a response comprising at least one indication of one of said WWW pages, responsive to said search results.
2. A method according to claim 1, comprising displaying said response to a user.
- 15 3. A method according to claim 1, wherein said at least one URL comprises a plurality of URLs.
4. A method according to claim 1, wherein said response is generated using a single search step and no iterations.
- 20 5. A method according to claim 1, comprising ranking said search results.
6. A method according to claim 5, wherein ranking of a WWW page is responsive to a number of groups of URLs pointed to by said WWW page.
- 25 7. A method according to claim 1, wherein said generating at least one search query, comprises:
- dividing said list of URLs into a plurality of groups and generating at least a single query for each group, wherein said at least a single query does not differentiate which URL in said group is pointed to by the results of the search,
- 30 wherein said executing comprises executing said generated at least one query for a plurality of said groups, generating a plurality of result lists.

197/01184

8. A method according to claim 7, wherein all of said groups have a same number of members.
9. A method according to claim 7, wherein at least three of said groups have a different
5 number of members from each other.
10. A method according to claim 7, comprising:
collating said result lists into a single list of search results.
- 10 11. A method according to claim 10, comprising ranking the contents of at least one of said
result lists.
12. A method according to claim 11, wherein said collating is responsive to said ranking of
said at least one of said result lists.
- 15 13. A method according to claim 11, wherein said ranking is applied to said result list after
it is generated.
14. A method according to claim 13, comprising filtering said at least one result list
20 responsive to said ranking.
15. A method according to claim 11, wherein said ranking is applied to said result list
during said execution.
- 25 16. A method according to claim 15, wherein said ranking is applied by adding at least one
limitation to said at least one generated search query.
17. A method according to claim 11, wherein said ranking comprises ranking responsive to
a number of said URLs pointed to by said result list.
- 30 18. A method according to claim 11, wherein said ranking comprises ranking responsive to
a morphological property of pages of said at least one result list.

197/01184

19. A method according to claim 18, wherein said morphological property comprises the existence of a link list.
20. A method according to claim 11, wherein said ranking indicates a probability of a
5 ranked page being a hub.
21. A method according to claim 11, wherein said ranking comprises ranking responsive to the presence of at least one key word in pages of said at least one result list.
- 10 22. A method according to claim 21, wherein said key word is related to a content of said list of URLs.
23. A method according to claim 21, wherein said key word is a word that serves as a statistical indicator that the page is a hub.
- 15 24. A method according to claim 23, wherein said key word is selected from the group "links", "index" and "resource".
25. A method according to claim 1, wherein said providing comprises a user providing a
20 list of URLs.
26. A method according to claim 25, wherein said user provided list of URLs comprises at least a part of a URL bookmark file.
- 25 27. A method according to claim 1, wherein said providing comprises a user providing a WWW page including a list of URLs.
28. A method according to claim 1, wherein said providing comprises:
a user providing one or more topic words; and
30 executing a preliminary search to find a list of URLs related to said one or more topic words.
29. A method according to claim 1, wherein said providing comprises:
a user providing a WWW page; and

197/01184

40. A method according to claim 39, wherein said response comprises a list of links listed in at least a given number of said WWW pages.
41. A method according to claim 40, wherein said given number is greater than 1.
42. A method according to claim 40, wherein said given number is greater than 2.
43. A method according to claim 39, wherein said list is arranged by WWW pages.
44. A method according to claim 39, wherein said list comprises information associated with a link in its corresponding WWW page.
45. A method according to claim 39, wherein said list indicates pages not including a link to any URL in a predetermined list of URLs.
46. A method according to claim 39, wherein said list indicates pages not including a link from the contents of any URL in a predetermined list of URLs.
47. A method according to claim 46, wherein said predetermined list is provided by a user.
48. A method of finding WWW pages, each of which includes at least one list of links to desired Internet resources, comprising:
providing at least one URL;
generating a list of URLs related to said at least one URL;
determining at least one WWW page that includes links to at least one URL of said list of URLs but not to said provided at least one URL; and
generating a response comprising at least one indication of one of said at least one WWW page.
49. A method according to claim 48, comprising displaying said response to a user.
50. A method according to claim 48, wherein said at least one WWW page comprises a plurality of WWW pages.

197/01184

51. A method according to claim 50, wherein said providing comprises providing a WWW page including having a link to said at least one URL.
52. A method according to claim 50, wherein said providing comprises providing a list of a plurality of URLs.
53. A method according to claim 50, wherein generating a list of related URLs, comprises generating a list of competition URLs.
54. A method according to claim 50, wherein generating a list of related URLs, comprises generating a list of similar URLs.
55. A method according to claim 50, wherein generating a list of related URLs, comprises finding WWW pages characterized in that a common WWW page includes links to at least one of said WWW pages and at least one of said at least one URL.
56. A method according to claim 50, wherein said determining comprises executing a query on a search engine.
